Weddings

In 30 years of weddings we have seen a lot of changes. With all the filters, retouch, and storybooks its great what we can do today. A lot of weddings have moved to locations outside of the church to venues that have a lot to offer and do great for pictures. With this change there are so many choices that a couple can make such as digital images only, storybooks,1 or 2 photographers, amount of time,media pack, which includes pictures and video clips to instant uploads to your Facebook or Instagram as your wedding is going on. Meeting at our studio and we can go over details and work up a package that will work for your wedding. This info link helps us to get samples ready for you to view when you come in. Thank you
